

List of Start-Ups with Green Initiatives

| Company | Introduction | Link |
|------------------------------|--|---|
| e-Farm Biotech Limited | Creating a circular economy by transforming discarded resources into animal feed and harnessing the power of the larvae of black soldier flies to convert waste into usable organic materials. | http://efb.com.hk/ |
| Alcarbo Technologies Limited | Developing a cutting-edge algae reactor to capture carbon using genetic screening technology and nanotechnology to achieve carbon neutrality. | https://www.cityu.edu.hk/hktech300/start-ups/angel-fund-start-ups |
| i2Cool Limited | Producing a Sahara-ant-inspired passive radiative paint for cooling without electricity and refrigeration to achieve thermal comfort and carbon neutrality. | https://i2cool.com/ |
| Farm66 Investment Ltd. | Pioneering an industry 4.0 solution for urban vertical farming through Farm66's vision to maximise the yield of organic vegetables using sustainable technologies. | https://www.farm66.com/en/home/ |
| Super Bamboo Limited | Designing the world's most advanced augmented bamboo-based material for making carbon-neutral and sustainable products. | https://www.thesuperbamboo.com/ |
| Leidenford Ltd. | Establishing a flexible, green and low-cost clean water supply system for all humanity | http://www.leidenford.com/ |
| Ergotek Limited | Transforming food waste into low-cost fertilisers and fish feed for agriculture and aquaculture industries. | https://www.ergotek.world/ |
| Ever View Technology Limited | Focusing on the commercialisation of next-gen tandem solar cell technology with a potential power conversion efficiency output of over 40% to help reduce carbon emissions. | https://www.cityu.edu.hk/hktech300/start-ups/angel-fund-start-ups |
| NerOcean Limited | Devising a new generation of marine sensors for a cost-effective solution to sustainable environmental monitoring and management. | https://neroclean.com/ |
| Cat Limited | Combating marine fouling and corrosion with an ecologically friendly, high-performance nano-photocatalytic coating. | https://www.cattech.io/ |

| | | |
|--|---|---|
| Vision Carbon Limited | Introducing the 1st transparent, verifiable, blockchain-based voluntary carbon trading platform in the Greater Bay Area. | https://www.visioncarbon.net/ |
| Locolla Limited | Using AI and big data to enable green mobility for a leading share bike company in Hong Kong. | https://loco.hk |
| Dory iGarden Limited | Integrating AI and IoT automation for vertical hydroponic solutions that make growing plants easy, addictive, ubiquitous and rewarding. | https://www.cityu.edu.hk/hktech300/start-ups/angel-fund-start-ups |
| Invisible & Innovative Technology (Asia) Limited | Developing audio and IoT products by upcycling wood waste with tech collaboration via CityU's patented technologies. | https://www.invisibletech.asia/ |
| Lacess Limited | Upcycling agricultural waste, post-consumer plastics and other innovative, planet-friendly materials for making sustainable footwear. | https://kibo.eco |
