Part II Course Details

Abstract

In order to raise the visual literacy level of students, the course is designed to introduce various concepts and application of visual expression, developing students' interpretation and creation skills in visual communication. The continuous teaching and learning experience allows student opportunity to experiment the use of various types of graphic communication associated closely with our living environment, enabling them the ability to act and react in this information age, which does not only saturated with text but also graphics contents. Instead of course-end assessment, continuous assessments which ties in with the diverse learning activities are incorporated to allow students ' self-evaluation in their learning process and as basis for student assessment in a course. Hands-on experience is engaged, in comparison to textual-memory based learning experience in other subjects. This provides a discovery enriched learning experience and encourage application of creativity and innovation in the pursuance of visual-based knowledge.

Course Intended Learning Outcomes (CILOs)

CILOs		Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Explain the different types of graphical representation in use in daily life to describe our environment.		x		
2	Identify the meanings and roles of different types of graphical representations.			x	
3	Evaluate the limitations of visual expression.		x		
4	Explain the essential elements in visual expression and its role in communication.			x	
5	Produce a set of graphics that effectively express a specific set of meanings.				x

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.
