

LT4256: TOPICS IN NEUROLINGUISTICS AND PSYCHOLINGUISTICS

Effective Term

Semester B 2024/25

Part I Course Overview

Course Title

Topics in Neurolinguistics and Psycholinguistics

Subject Code

LT - Linguistics and Translation

Course Number

4256

Academic Unit

Linguistics and Translation (LT)

College/School

College of Liberal Arts and Social Sciences (CH)

Course Duration

One Semester

Credit Units

3

Level

B1, B2, B3, B4 - Bachelor's Degree

Medium of Instruction

English

Medium of Assessment

English

Prerequisites

LT2204 Language and Mind or LT3234 Language and Cognition

Precursors

Nil

Equivalent Courses

Nil

Exclusive Courses

Nil

Part II Course Details

Abstract

With the use of new behavioural and brain imaging techniques, many new insights into the cognitive and neural processes underlying language comprehension and production have been established. This course aims to provide a comprehensive overview of the cognitive and neural processes that are critical, especially for the production of language, but also comprehension, and the influence of language disorders on those processes. It also aims to help students develop an understanding of the state-of-the-art developments in the neurolinguistic and psycholinguistic fields. Electrophysiological techniques and possibly neuroimaging methods will be introduced to examine language learning and processing. This course aims to let students have a clear understanding of how languages are processed from the neurocognitive perspective. Different theoretical approaches to language learning and processing will be contrasted. Some hands-on practices of how to conduct research will be provided (lab visits).

Course Intended Learning Outcomes (CILOs)

CILOs		Weighting (if DEC-A1 DEC-A2 DEC-A3 app.)			
1	Describe the major theoretical frameworks adopted in neurolinguistic and psycholinguistic research;		x	x	
2	Analyse the individual variables in language processing;		x	x	
3	Compare and contrast different psychological approaches to language processing		x	x	x
4	Critically review the psychological and neural processes underlying language comprehension and production.		x	x	x
5	Introduce electrophysiological techniques to examine language processing in different populations;		x	x	x
6	Design and conduct a study to test language production or language processing theories by using electrophysiological or behavioural techniques.		x	x	x

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Learning and Teaching Activities (LTAs)

LTAs		Brief Description	CILO No.	Hours/week (if applicable)
1	Readings	Students will read book chapters and research articles assigned weekly	1, 2, 3, 4, 5, 6	

2	Lectures	Students will engage with theories, concepts, explanations, illustrations, synthesis of readings in lectures.	1, 2, 3, 4, 5	
3	Class activities	Students will answer designed questions, participate in group discussion and problem solving activities, summarize and present research articles	1, 2, 3, 4, 5, 6	

Assessment Tasks / Activities (ATs)

	ATs	CILO No.	Weighting (%)	Remarks (e.g. Parameter for GenAI use)
1	Group assignments Group assignments are designed to enable students to apply the neurolinguistic or psycholinguistic concepts, theories or models taught in class to solve problem or analyse data.	1, 2, 3, 4, 5, 6	20	
2	Mid-term Quiz (2 hours) Test on neurolinguistics and psycholinguistics with specialized terms and concepts. Checking acquired knowledge by judging key differences among key concepts, models and theories. Developing critical thinking via recognizing and identifying similarities/ differences among key concepts, models and theories.	1, 2, 3, 4, 5	20	
3	Project The project requires students to design and conduct a study on language production or comprehension, apply the concepts and theories they have learnt to analyse the results. Students are required to give an oral report of their project.	1, 2, 3, 4, 5, 6	20	

4	Term paper Students are required to write up a term paper about the logic, design and empirical findings of their project. Apply the learned concepts in interpreting the results. Developing critical thinking via recognizing and identifying similarities/differences among key concepts, models and theories.	1, 2, 3, 4, 5, 6	40	
---	---	------------------	----	--

Assessment Rubrics (AR)**Assessment Task**

1. Group assignment

Criterion

Knowledge application, Critical thinking and problem solving

Excellent (A+, A, A-)

Excellent application of the concepts, theories or models taught in class to analyse data or solve problem.

Demonstration of excellent abilities of critical thinking and problem solving

Good (B+, B, B-)

Good application of the concepts, theories or models taught in class to analyse data or solve problem.

Demonstration of good abilities of critical thinking and problem solving

Fair (C+, C, C-)

Satisfactory application of the concepts, theories or models taught in class to analyse data or solve problem.

Demonstration of average abilities of critical thinking and problem solving

Marginal (D)

Unsatisfactory application of the concepts, theories or models taught in class to analyse data or solve problem.

Demonstration of below-average abilities of critical thinking and problem solving

Failure (F)

Incorrect application of the concepts, theories or models taught in class to analyse data or solve problem.

Demonstration of low abilities of critical thinking and problem solving

Assessment Task

2. Mid-term Quiz (2 hours)

Criterion

Interpreting neurolinguistic and psycholinguistic phenomenon with specialized terms and concepts.
Developing critical thinking via recognizing and identifying similarities/differences among key concepts, models and theories.

Excellent (A+, A, A-)

Excellent interpretation of neurolinguistic and psycholinguistic phenomenon with specialized terms and concepts.
Excellent development of critical thinking via recognizing and identifying similarities/differences among key concepts, models and theories.

Good (B+, B, B-)

Good interpretation of neurolinguistic and psycholinguistic phenomenon with specialized terms and concepts.
Good development of critical thinking via recognizing and identifying similarities/differences among key concepts, models and theories.

Fair (C+, C, C-)

Satisfactory interpretation of neurolinguistic and psycholinguistic phenomenon with specialized terms and concepts.
Satisfactory development of critical thinking via recognizing and identifying similarities/differences among key concepts, models and theories.

Marginal (D)

Unsatisfactory interpretation of neurolinguistic and psycholinguistic phenomenon with specialized terms and concepts.
Unsatisfactory development of critical thinking via recognizing and identifying similarities/differences among key concepts, models and theories.

Failure (F)

Poor interpretation of neurolinguistic and psycholinguistic phenomenon with specialized terms and concepts.
Poor development of critical thinking via recognizing and identifying similarities/differences among key concepts, models and theories.

Assessment Task

3. Project

Criterion

Experimental design of the study
Clarity of the oral presentation

Excellent (A+, A, A-)

Excellent theory-driven and scientific based design of the study
Excellent clarity of the oral presentation

Good (B+, B, B-)

Good theory-driven and scientific based design of the study
Good clarity of the oral presentation

Fair (C+, C, C-)

Satisfactory theory-driven and scientific based design of the study
Satisfactory clarity of the oral presentation

Marginal (D)

Unsatisfactory theory-driven and scientific based design of the study
Unsatisfactory clarity of the oral presentation

Failure (F)

Poor theory-driven and scientific based design of the study

Poor clarity of the oral presentation

Assessment Task

4. Term paper

Criterion

Developing critical thinking via recognizing and identifying similarities/differences among key concepts, models and theories.

Logic and relevancy of the literature review

Interpreting neurolinguistic or psycholinguistic effects with specialized terms and concepts.

Excellent (A+, A, A-)

Excellent development of critical thinking via recognizing and identifying similarities/differences among key concepts, models and theories.

Excellent literature review

Excellent interpretation of neurolinguistic or psycholinguistic effects with specialized terms and concepts.

Good (B+, B, B-)

Good development of critical thinking via recognizing and identifying similarities/differences among key concepts, models and theories.

Good literature review

Good interpretation of neurolinguistic or psycholinguistic effects with specialized terms and concepts.

Fair (C+, C, C-)

Satisfactory development of critical thinking via recognizing and identifying similarities/differences among key concepts, models and theories.

Satisfactory literature review

Satisfactory interpretation of neurolinguistic or psycholinguistic effects with specialized terms and concepts.

Marginal (D)

Unsatisfactory development of critical thinking via recognizing and identifying similarities/differences among key concepts, models and theories.

Unsatisfactory literature review

Unsatisfactory interpretation of neurolinguistic or psycholinguistic effects with specialized terms and concepts.

Failure (F)

Poor development of critical thinking via recognizing and identifying similarities/differences among key concepts, models and theories.

Poor literature review

Poor interpretation of neurolinguistic or psycholinguistic effects with specialized terms and concepts.

Part III Other Information

Keyword Syllabus

Cognitive Neuroscience of Language, language acquisition, brain lateralization, hemispheric differences, individual differences in language

Reading List

Compulsory Readings

Title	
1	De Zubizaray, G. & Schiller, N.O. (2019). The Oxford Handbook of of Neurolinguistics (Oxford Handbooks), Oxford University Press
2	Gazzaniga, M. S., and Mangun, G. R. (2014). The Cognitive Neurosciences. 5th Edn. Cambridge, Massachusetts: The MIT Press.
3	Raymer, A. M., and Gonzalez Rothi, L. J. (2017). The Oxford Handbook of Aphasia and Language Disorders. Oxford University Press.
4	Harley, T.A. (2014) The Psychology of Language: From Data to Theory.4th edition. Hove, East Sussex; New York: Psychology Press.
5	Kemmerer, D. (2023) Cognitive Neuroscience of Language: 2nd Edition. New York: Routledge.

Additional Readings
