# MNE3122: FLUID MECHANICS

**Effective Term** Semester B 2024/25

# Part I Course Overview

**Course Title** Fluid Mechanics

Subject Code MNE - Mechanical Engineering Course Number 3122

Academic Unit Mechanical Engineering (MNE)

**College/School** College of Engineering (EG)

**Course Duration** One Semester

**Credit Units** 3

Level B1, B2, B3, B4 - Bachelor's Degree

**Medium of Instruction** English

Medium of Assessment English

**Prerequisites** MNE2109/BME2109 Engineering Mechanics

**Precursors** Nil

**Equivalent Courses** Nil

**Exclusive Courses** Nil

Additional Information

#Prerequisites which are not part of the Major Requirement are waived for students admitted with Advanced Standing.

# Part II Course Details

# Abstract

Fluid mechanics is applied in a wide spectrum of practical applications ranging from micro-fluidic systems to large aerospace crafts. It is challenging since fluid mechanics requires more proper analysis of a problem than direct application of equations. Students must first assess the problem, make and justify appropriate assumptions and simplifications, identify suitable concepts and apply them to formulate the proper solutions. The course aims to lay down the basic principles and governing equations of fluid mechanics, and demonstrate their applications in engineering practice with real-word engineering examples.

### Course Intended Learning Outcomes (CILOs)

	CILOs	Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Describe the basic principles and governing equations of fluid mechanics.			Х	
2	Solve fluid mechanics problems using given principles.			Х	
3	Apply relevant principles to obtain solutions for fluid mechanics problems.			Х	
4	Interpret the experimental results obtained in laboratory sessions to realize the application of fluid mechanics in real life problems.			x	

### A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

### A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

### A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

### Learning and Teaching Activities (LTAs)

	LTAs	Brief Description	CILO No.	Hours/week (if applicable)
1	Lecture	Explain key concepts, principles, theories of fluid mechanics and their applications.Provide room to clarify doubts that would enhance the understanding of the subject.	1, 2, 3	3 hrs for 13 weeks

#### 3 MNE3122: Fluid Mechanics

2	Laboratory Work	Investigate concepts	1, 2, 3, 4	3 hrs for 3 weeks
		through hand-on		
		experiments; acquire		
		skills in handling		
		of apparatus and in		
		engineering report		
		write up; promote active		
		participation		

#### Assessment Tasks / Activities (ATs)

	ATs	CILO No.	Weighting (%)	Remarks (e.g. Parameter for GenAI use)
1	Tests and Assignments	1, 2, 3	25	Two test(s) and three assignments
2	Laboratory Reports	1, 2, 3, 4	15	3 reports to be submitted

#### Continuous Assessment (%)

40

#### Examination (%)

60

#### **Examination Duration (Hours)**

3

# Additional Information for ATs

For a student to pass the course, at least 30% of the maximum mark for both coursework and examination should be obtained.

### Assessment Rubrics (AR)

### Assessment Task

Tests and Assignments

## Criterion

1.1 Capacity for understanding the key concepts, principles and theories of fluid mechanics.1.2 Ability to analyse and solve related engineering problems.

### Excellent (A+, A, A-)

High

# Good (B+, B, B-) Significant

Fair (C+, C, C-) Moderate

Marginal (D) Basic

Failure (F) Not even reaching marginal levels

### Assessment Task

Laboratory Reports

#### Criterion

2.1 Capacity for self-learning to understand the principles of fluid mechanics through performing experiments by following instructions given.

2.2 Ability to analyse and present the results of experiments in the proper technical report format.

Excellent (A+, A, A-)

High

Good (B+, B, B-)

Significant

Fair (C+, C, C-) Moderate

Marginal (D)

Basic

Failure (F) Not even reaching marginal levels

### Assessment Task

Examination

### Criterion

3.1 Ability to explain the basic principles and fundamental concepts of fluid mechanics.

3.2 Capacity for analysing and solving given problems using relevant and appropriate formulae.

Excellent (A+, A, A-)

High

Good (B+, B, B-) Significant

Fair (C+, C, C-) Moderate

Marginal (D)

Basic

Failure (F) Not even reaching marginal levels

### Additional Information for AR

Note: For a student to pass the course, at least 30% of the maximum mark for both coursework and examination should be obtained.

# Part III Other Information

**Keyword Syllabus** 

#### 5 MNE3122: Fluid Mechanics

- · Basic concepts and fluid properties
- · Pressure and fluid statics
- $\cdot$   $\,$  Fluids in motion
- $\cdot$   $\,$  Integral forms of the fundamental laws
- · Differential forms of the fundamental laws
- · Dimensional analysis and modelling Internal flows
- $\cdot$  External flows
- · Compressible flow
- · Open channel flow
- · Flows in piping systems
- · Introduction of turbomachinery
- · Measurements in fluid mechanics
- · Computational fluid dynamics

#### **Reading List**

#### **Compulsory Readings**
